

IN THE CLAIMS:

Please cancel claims 1-16 without prejudice.

Please add the following new claims:

17. (New) A bubble producing assembly, comprising:
a frame;
a first bubble producing device having at least one loop; and
a second bubble producing device having at least one loop;
wherein the first and second bubble producing devices are positioned in spaced-apart manner, and on the same plane, on the frame.
18. (New) The assembly of claim 17, wherein each loop of the first and second bubble producing devices has a plurality of ridges provided thereon.
19. (New) The assembly of claim 17, wherein the frame defines an opening with one of the first or second bubble producing devices positioned over the opening.
20. (New) The assembly of claim 19, wherein the assembly further includes a fan positioned inside the opening.
21. (New) The assembly of claim 17, further including a third bubble producing device positioned on the frame and spaced apart from the first and second bubble producing devices.
22. (New) The assembly of claim 21, wherein the third bubble producing device is positioned on the same same plane as the first and second bubble producing devices.
23. (New) A bubble producing assembly, comprising:
a first bubble producing device having at least one loop;
a second bubble producing device having at least one loop;
a third bubble producing device having at least one loop; and
a frame that supports the first, second and third bubble producing devices in a manner where the first, second and third bubble producing devices are spaced apart from each other.

24. (New) The assembly of claim 23, wherein each loop of the first, second and third bubble producing devices has a plurality of ridges provided thereon.

25. (New) The assembly of claim 23, wherein the frame defines an opening with one of the first, second or third bubble producing devices positioned over the opening.

26. (New) The assembly of claim 25, wherein the assembly further includes a fan positioned inside the opening.
